Plan an Affordable, Adventurous and Culturally Enriching Trip to Iceland

A New Travel Guide Encouraging Black Women to Visit Iceland

BRIDGEPORT, CT - July 16, 2019 - Does the thought of planning a trip to Iceland excite you? Tired of spending hours researching when to visit, what to pack or things to do? Wondering if you'll feel welcome as a black woman? These are the questions Danielle Desir answers in her debut book titled *Iceland: Nature, Nurture & Adventure*. After three trips to Iceland, Danielle shares her practical travel advice for planning an affordable and adventurous trip to the Nordic island nation.

From ways to save money to the cultural norms you should know about, *Iceland: Nature, Nurture & Adventure* helps black women navigate Iceland's natural landscapes, delicious food and rich culture. "Iceland is more than a destination." Desir says. "Despite the challenges black women may face while traveling, I want to inspire more people of color to visit and experience how Iceland can broaden their horizons and push them outside of their comfort zones."

Even though African-American travelers spend \$50 billion annually on travel, you would never know it since travelers of color are rarely seen in travel marketing. Now more than ever it's important for black travelers to share their stories and pay it forward by showing other travelers of color around. The insights and observations shared in *Iceland: Nature, Nurture & Adventure* are perfect for black women travelers seeking the perspective of a traveling black woman or anyone interested in all that Iceland has to offer.

Iceland: Nature, Nurture & Adventure is available for purchase on Amazon on August 11, 2019.
